EXPERIENCE

Software Developer
Beyond Data Networks

Feb 2025 – Feb 2026
Lagos, Nigeria (Remote)

- Collaborated within a development team to build and manage front-end and back-end applications.
- Participated in the full development lifecycle, including design testing, security auditing, and system research.
- Assisted in the development of scalable applications, ensuring code integrity and security compliance.
- Optimized application performance through collaborative troubleshooting and iterative design updates.

IT Support Intern
African University of Communication and Business (AUCB)

Sept 2025 – Dec 2025
Accra, Ghana

- Resolved critical hardware and networking issues to maintain university-wide infrastructure uptime.

- Managed the student portal database, handling sensitive data entry and troubleshooting access issues.
- Maintained and configured biometric fingerprint access systems and general security infrastructure.
- Coordinated external technical relations and supported administrative digital workflows.

Full-Stack Developer (Freelance)
Independent Projects

2023 – 2025
Accra / Lagos

- Developed and launched digital platforms for startups including Moafrikan and various personal ventures.
- Designed end-to-end software solutions tailored to specific client needs, from UI/UX to server-side logic.

CERTIFICATIONS

- **Front-End Development:** Individual certifications in HTML, CSS, JavaScript, and React.
- **Back-End Development:** Individual certifications in Java and PHP.
